Introduction

Aspiring Data Engineer with experience in ETL pipelines, SQL data warehousing, PySpark, cloud platforms, and ML-based analytics solutions. Skilled in Python, Azure, Snowflake, Databricks, and business intelligence tools.

Technical Skills

Languages	Python, SQL (MySQL), JavaScript, HTML/CSS
Technologies/Frameworks	PySpark, Pandas, NumPy, Scikit-learn, PyTorch, Matplotlib, REST APIs
Cloud & Data Platforms	Azure, Snowflake, Databricks, ETL Pipelines, Star Schema, Data Modeling
BI & Visualization	Power BI, Tableau
AI & ML	LLMs, RAG, Feature Engineering, EDA, Model Evaluation

Education

MS Ramaiah Institute of Technology, Bangalore | B.E – Electronics & Telecommunication Dec 2022 – Jun 2026

Experience

Qapita Fintech | Data Resource Intern [Certificate](#) Bangalore | Jan 2026 – May 2026
Cohort analysis, Data Collection, Standardization, KPI Dashboards

- Collected, validated, and organized datasets for internal analytics. Performed Cohort analysis to identify customer behavior trends, retention patterns, and engagement metrics for business insights.
- Implemented data quality checks and standardization workflows, improving data accuracy and reliability by **20%**.

Medi Assist | Data Science Intern [Certificate](#) Bangalore | Sep 2025 – Oct 2025
Python, SQL, Excel, EDA, Healthcare Analytics

- Cleaned and preprocessed large-scale healthcare claim datasets using Python, SQL, and Excel; reduced missing values and data redundancy by **20%**.
- Conducted exploratory data analysis (EDA) to identify anomalies, patterns, and trends, enabling data-driven improvements to claim processing workflows.

Projects

Customer Churn Prediction System | *Python, Scikit-learn, EDA, Model Evaluation* [\[GitHub\]](#) Feb 2026

- Built an end-to-end ML pipeline on a telecom dataset – performed feature encoding, missing value treatment, and EDA to uncover churn patterns.
- Trained and evaluated multiple classifiers; enabled proactive customer retention strategies through predictive insights, directly supporting business decision-making.

SQL Data Warehouse | *SQL, ETL, Star Schema, Data Modeling, Indexing* [\[GitHub\]](#) Nov 2025

- Designed and built a production-grade data warehouse using Star Schema with Fact and Dimension tables; performed end-to-end ETL to ingest, clean, and transform data from multiple sources.
- Optimized query performance via indexing and aggregations, improving data retrieval efficiency by **95%** and enabling insightful business reporting.

AI-Powered Resume Analyzer & Job Recommender | *Python, LLM, RAG, React.js, ChromaDB, PyPDF* Jun 2025

- Built a full-stack web app using LLMs and RAG architecture to parse resumes (PyPDF) and deliver job-specific feedback; integrated REST API with ChromaDB for semantic vector search.
- Improved candidate shortlisting accuracy by **70%** and boosted interview call rates by **40%** based on user survey data.

Certifications

- Advanced SQL for Data Engineering [\[View\]](#)
- Deloitte Technology Job Simulation [\[View\]](#)
- Intro to Data Engineering – Certified by 365 Data Science [\[View\]](#)
- GenAI Powered Data Analytics Job Simulation [\[View\]](#)

Achievements

- Won **Gold Medal** at State Level Inter-College Athletic Meet.
- Participated in **All India Hackathon** conducted by IIT Madras.
